PROUD TO BE MARKET LEADERS IN

Sustainability

Sustainability is at the core of everything we do at BiForm. Our composite decking is made from recycled plastic and sustainably sourced FSC-certified wood, reducing environmental impact without compromising performance. Each board repurposes thousands of plastic bottles, helping to keep waste out of landfills.

We're proud to be Red List Free, carry a Declare label, and contribute to Green Star and Home Star credits. Our packing take-back programme further reduces waste, and our partnership with Trees That Count supports native reforestation across Aotearoa.

Choosing BiForm means building smarter - for your home, your family, and the future of our planet.

One 40m2 BiForm Deck = 16,073 plastic bottles recycled + One 15m tree worth of FSC® Certified Timber.

BiForm Forest Board

138mm x 20mm x 4850mm

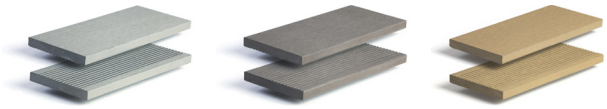

BiForm FOREST Board brings together the timeless appearance of traditional timber decking with the long-term performance benefits of solid composite technology.

Its **ultra-compressed construction helps reduce thermal movement**, enabling traditional surface fixing and providing greater installation flexibility while delivering a clean, classic finish.

Designed to perform in demanding conditions, FOREST Board is also **well suited to harsh and damp environments** where durability and long-term reliability are important.

Available in three versatile colours, FOREST Board is a durable, low-maintenance solution suited to a wide range of residential and commercial applications, including high-use environments such as schools, walkways, and public spaces.

Colour Options:

Forest Slate | Forest Brown | Forest Coastal

Why Choose BiForm?	BIFORM	Timber
Low-maintenance	✓	✗
No need to stain or oil	✓	✗
BRANZ Appraised	✓	✗
UV-tested and resistant	✓	✗
Environmentally Friendly	✓	✗
Won't crack or warp	✓	✗
Uniform Length	✓	✗
Anti-fungal	✓	✗
Family safe (no splinters)	✓	✗
Boards are straight & true	✓	✗

Eco-friendly Solid Composite Decking

Decks designed for New Zealand Conditions.

BiForm Solid Composite Decking has been specifically developed for New Zealand's harsh weather conditions. While most composites contain 50% plastic, BiForm has opted for 30% plastic content, allowing for greater durability when standing up to New Zealand's higher UV levels. Less plastic means less thermal expansion and contraction.

Safe for High-Use Spaces.

Designed for shared and high-use environments, BiForm FOREST Board provides a safe, reliable surface underfoot. Its R11 slip resistance rating helps improve confidence in wet or exposed areas, while the solid composite profile means no splinters and no exposed nails catching feet. With a Red List Free Declare Label, it also supports safer spaces with no toxic chemicals of concern released into the environment daily.

Long Lasting, Low Maintenance.

Combining FSC® certified timber and recycled plastic, our formula brings out the best of both elements, creating a durable decking alternative built to outlast and outperform regular decking timber. No oiling, staining or painting is required. Just keep it clean, and BiForm composite decking will reward you with years of low-maintenance, cost-effective performance.

25 Year Warranty.

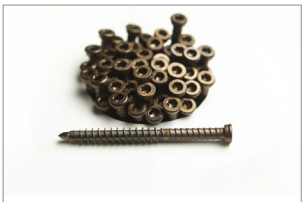

As New Zealand's leading composite decking supplier, BiForm is pleased to offer our transferable 25-year limited warranty. After years of experience with our product in New Zealand's high UV and high relative humidity conditions, alongside our robust testing, we are confident in offering our customers this peace of mind.
